SUMMARY

Robert is a Research Consultant who joined Regeneris in 2017 after completing his MSc in Economics at the Stockholm School of Economics. During his time at Regeneris he has worked in both public and private sector projects involving economic impact assessments and economic strategies. This has included writing baselines and undertaking quantitative and qualitative analysis. He previously worked at the Center for European Law and Economics where he conducted detailed market research and analysis and produced concise, informative reports.

SKILLS AND EXPERIENCE

ECONOMIC RESEARCH AND ANALYSIS

Robert has experience of researching and analysing complex economic issues using both qualitative and quantitative methods to provide rigorous analysis. He has conducted research across a range of sectors and regions. This varies from analysing the data centre market in the US and EU to investigating how ERDF has affected low carbon activities, to examining the effects of new residential, office or hotel developments.

ECONOMIC STRATEGY

Robert is experienced in the production of economic strategies. He has worked on a number of projects where he has been tasked with producing a baseline analysis which was used to underpin the strategy. Recently he has worked on economic strategies for large cities such as Brighton & Hove and for areas at a more local level such as Waterloo and Southbank.

ECONOMIC IMPACT ASSESSMENT

Robert has worked on a range of economic impact assessments. He has estimated the economic benefit of large developments such as the expansion of a technology park or the construction of a hotel. He has helped to prepare socio-economic chapters for environmental statements for developments in London and the South East. He also has experience in assessing the business case for large-scale projects.

SOCIO-ECONOMIC ANALYSIS AND PRESENTATION

Robert has significant experience of working with large datasets and employing statistical techniques to answer research questions. He is proficient at collecting information on various demographic, employment and social indicators, analysing that information and presenting it to a range of different audiences using graphs, charts, infographics and maps. He is capable of effectively communicating complex messages in a clear and concise manner. He is adept at using Excel, GIS mapping tools and Snap surveying tools.
